

At **Gen 2De** (General Developer and Designer), we believe that every business — no matter how small — deserves a strong online presence. Our mission is simple: to turn your ideas into beautifully crafted, functional websites that help your business grow.

We specialize in clean design, responsive development, and fast delivery, focusing on what truly matters — your success. Whether you're launching a new venture or scaling an existing one, we provide tailor-made digital solutions to match your goals and budget.

Let's build your digital future, together.

OUR SERVICES

1. WEBSITE DESIGN AND DEVELOPMENT
2. WEBSITE DEPLOYMENT AND MAINTENANCE
3. SEO OPTIMIZATION
4. BRANDING AND GRAPHICS
5. MOBILE RESPONSIVE WEBSITE

TECH-STACK

Our team employs a cutting-edge and versatile tech stack to deliver high-performance and scalable web applications. We use **React** for building dynamic and responsive user interfaces, while **Tailwind CSS** enables us to design custom and efficient layouts. For backend development, we rely on **Node.js and Express**, ensuring robust and scalable server-side functionality. To manage data, we utilize both **MongoDB and PostgreSQL**, offering flexibility for NoSQL and relational database requirements. This diverse tech stack, complemented by other **modern tools**, ensures the **seamless development, deployment, and maintenance of our applications.**

PROJECTS

1. **Full-Stack Patient Appointment Booking Platform** Create an easy-to-use hospital appointment system where patients can book appointments with doctors, view availability, and pay for services online.

Key Features:

- React-powered front-end with intuitive UI/UX
- Secure and easy login and registration for both patients and doctors
- Real-time doctor availability and appointment booking
- Integrated payment processing using Stripe
- Admin interface for managing appointments, payments, and user data
- MongoDB for persistent storage of all data
- Email and SMS notifications for appointment reminders

2. Modern Developer Portfolio using Next.js, TypeScript & ShadCN UI

New Gen Portfolio is a sleek and modern developer portfolio built with Next.js (App Router) and TypeScript, styled using ShadCN UI components.

Key Features:

- Built with Next.js App Router for optimal routing, performance, and SEO
- Written in TypeScript for type safety and maintainability
- Styled using ShadCN UI and Styled Components
- Sections for About, Skills, Projects, Resume, and Contact
- Responsive layout with smooth transitions and animations
- Integrated contact form with email sending functionality

Clean, light-themed interface with accessible design standards
